

Year long training

Life long mentorship

HOW TO GET THE BEST OUT OF THE COURSE

Delegates get the maximum benefit by coming with clear goals, honesty about their current skill level, and a willingness to be mentored. Active participation, asking uncomfortable questions, sharing failures as well as successes, and staying connected with mentors after the course are key. This is not a passive course—it rewards those who engage deeply and are committed to translating learning into safe surgical practice back in their own hospitals.

CERTIFICATION

- Full Course Certificate awarded upon minimum 80% attendance across online and hybrid modules

ABOUT SQUIRRELS LEARNING

Squirrels Learning is an independent medical education initiative dedicated to advancing the training of healthcare professionals through innovative teaching methodologies and contemporary technology.

SQUIRRELS Fourth Advanced Paediatric Laparoscopy Training Course

2026-2027

NEW LAUNCH
**ONLINE
MODULE**

Squirrels Training Institute

ABOUT THE COURSE

The Squirrels Advanced Paediatric Laparoscopy Training Course is a structured, multi-module programme designed to provide deep conceptual clarity and long-term surgical mentorship in paediatric minimally invasive surgery.

This is not a one-weekend exposure course.

It is a guided pathway toward safely establishing and refining paediatric laparoscopy in your practice.
